

FRAME_S.

The perfect framework for open offices.

CREATING SPACE WITH EASE.

FRAME_S combines storage and partition elements in a multifunctional workplace system that is ideal for open offices. The system makes it easier to create individual work areas for teams or divisions and offers a high degree of privacy and personal organisation. The FRAME_S module is available in different sizes and includes a partition wall, a tall cabinet and side frame. Easy to combine and expand, it adapts to your individual needs.

CLEVER FEATURES.

The FRAME_S smart system is the first of its kind to use the overhead space for storage. The overhead box offers additional shelf space connected conveniently to the workstation while also extending the visual partition. It can also be combined with an integrated lighting system, which can illuminate either individual bays or the whole area.

DESIGN: Christian Horner

MODULAR AND VERSATILE.

FRAME_S is a system of free-standing modules that can be set up side-by-side or parallel to each other. Bene's range of tables in a choice of 4 widths fit perfectly between the frames and overhead cupboards, and there is room for a electric height-adjustable desks too.

Keep things in order. With the intelligent inner organisation of FRAME_S, work utensils and office supplies are easy to reach and easy to organise.

SPOTLIGHT ON YOUR WORKPLACE.

Each station can be fitted with overhead lighting, to illuminate the desk and its surroundings, creating an autonomous workplace system. Lighting can also be fitted into the top of the module, so that even spaces with low-ceiling can be illuminated, creating different zones.

FOCUSING ON THE ESSENTIALS.

Wall-facing workstations allow undisturbed and focussed work. Fabric panelled partition elements help reduce sound levels and provide space for personal touches like notes, photos and invitations.

The tall side cabinet, shown here with a fitted white board, offers plenty of storage space in addition to the overhead box. Together they create a comfortable alcove perfect for focussed work.

EFFICIENT SETTINGS.

Additional furniture elements, such as standing height tables or comfortable lounge sofas, positioned adjacent to individual work stations help to create settings that are conducive to open communication and collaboration with in the team.

The eponymous frame component of FRAME_S creates stability while functioning as a visual or acoustic partition, depending on the selected design elements.
